Features and benefits:

- Two levels of lighting options using Rotator, Strobe or Halogen
- Weather-proof housing
- Siren option using 100 watt centre mounted speaker
- Hazard's unique Staggered Rotator System provides maximum vehicle side warning
- Synchronised Rotators available on request
- LED now available
- Capable of utilising Cleversector™ (12V only) technology (combination takedown, intersection and alley light)

Construction:

- Two level design gives unobstructed light output
- Unique body hugging shape allows extra lighting without adding to height
- Hinged top lens allows easy access
- Plug in wiring harness enables easy installation and replacement if damaged
- Aluminium centre chassis enhancing the monocoque (single shell) polycarbonate construction creating a stable design at high speeds and in harsh environments
- Height (centre) 130mm Width (centre) 305mm
- Lengths available: 810, 1070, 1200, 1330, 1460, 1590, 1720, 1850 and 1980mm

Electrical:

- Units available in 12 or 24 volt
- May be controlled by conventional switches, relays or an integrated siren/amplifier switch (such as 809-001)
