Dispersant System

- Diesel driven spray set for application of dispersant on oil spills.
- The built-in pump and ejector allow for spraying both neat and dilute dispersant.
- Spray arms are designed for use on vessels of opportunity and are easy to install.
- Spray nozzles ensure efficient use of dispersant and down pipes are included
- High-pressure diaphragm pump for optimum droplet size.
- Available in an electrically driven version for fixed installations.

KAJ manufactures Dispersant Spraying Systems and also Oil Dispersants for both sea and fresh water. The spraying systems are independent spraying systems that are intrinsically safe with the exact amount of the required mixture of dispersants and water. Option of controllable lances or automatic nozzles.

Temporary & Floating Storage Tanks

KAJ manufactures several types of temporary storage tanks that are collapsable, mobile and readily to be deployed immediately for oil spills.

The on-land temporary storage are collapsable and can be stored in casings allowing it to be mobilised easily. It is primarily used for collection of contaminated liquids of personnel, equipment and also decanting of recovered oil or chemicals.

Storage Containers and Boom Reels

KAJ manufacture a complete range of custom-built boom reels for both the rubber boom range and the PVC/PU booms. These are either open style or built into the frame of a custom made container. All reels are driven hydraulically from our range of diesel power packs and are manufactured of steel plates and profiles and finished with a high quality, 3-layer epoxy paint system. The containers have a floor of 25mm plywood plate.

Reels for the light booms are fitted with a high torque hydraulic gear motor and the reels for HD booms drive the drum through a planetary gearbox and a heavy-duty chain drive. This may be replaced with direct hub drive gear motors if required.

- Open or containerized reels for the storage, deployment and recovery of all types of My-Boom oil containment boom.
- Both containerized and open reels are supplied with forklift channels, lifting eyes and -sling.
- Open reels are supplied with weather cover.
- Optional - boom guide roller to assist recovery operations.
- The containerized version has fully opening double doors with rubber sealing and option for lift off back panel for in-line deployment of several containers. The container is equipped with ISO twist lock corners at the bottom. They are ideal for long-term storage of boom, protecting it from the sunlight and weather

Oil Spill Response Kits

KAJ OSR Kits are thoughtfully designed to contain spills of any kind. And because we know how critical the first three minutes are for any spills or leaks, our products are packaged with the suitable accessories to suit your specific requirements.

KAJ OSR Kits are designed for workshops, service vehicles, transport trucks, warehouses and any 'high risk' areas, to contain and clean up spills, They are effective on fuels, oils, hydraulic fluids or any other liquid spill or leak that occurs in a controlled industrial, commercial or marine environment.

Among some of our custom design kits :

- Workshop Kit
- Transport Kit
- Acid Station Spill Kit
- Caustic Station Spill Kit
- Marine Station Spill Kit
