

**DHR**

With luminescent hoses.

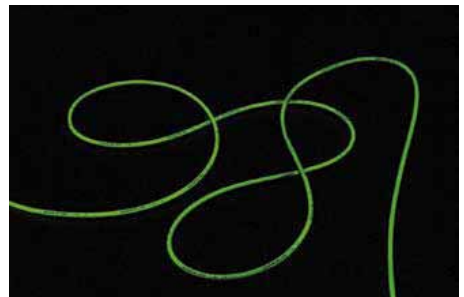

On the convenient DHR dual hose reel you can connect two rescue tools and store them ready for operation in the truck. When needed, the rescue equipment is removed and the hoses are unrolled. This ensures a fast rescue.

## Advantages

- + Easy to wind and unwind, even sideways, thanks to the new hose guides
- + Large reel brake for easy operation – even with gloves
- + Fold-away handle that cannot get lost
- + Either attached to the power unit or separately on the truck
- + Individual winding and unwinding – even under pressure
- + Safety ratio of the hoses more than 4:1

## LUMINESCENT HOSES

Rescue work at night is difficult enough. So it's good if hoses don't trip you. This is why our hoses are luminescent, making rescue work safer in the dark.

 Technical data	<b>DHR SIMO</b>
Length	2 x 66 ft. / 2 x 20 m
